RE: Report of Phase I Environmental Site Assessment  
Vacant Parcel  
1544 Northwest 58<sup>th</sup> Terrace  
Miami, Florida 33142  
Project Number HA24-7013B

Dear Ms. Pinkhasov,

As authorized, Hydrologic Associates U.S.A., Inc., (HAI) has completed the Phase I Environmental Site Assessment (ESA) at the above referenced subject property. The attached report documents the results of the assessment and our recommendations. This report is intended for the use of City of Miami Department of Housing and Community Development and should not be relied upon by any other parties without the express written consent of HAI. The report is based on the dates of the site inspection and should not be relied upon at substantially later dates. The discovery of any additional information concerning the environmental conditions at the site should be reported to us for our review so that we can reassess potential environmental impacts and modify our recommendations, if necessary.

Sincerely,

Hydrologic Associates USA, Inc.

James T. Miller, P.E.  
Project Manager

## 1.0 SUMMARY

Hydrologic Associates USA, Inc. (HAI) was contracted by Ms. Dollila Pinkhasov of City of Miami Department of Housing and Community Development to conduct a Phase I Environmental Site Assessment of the subject property located at 1544 Northwest 58<sup>th</sup> Terrace, Miami, Florida 33142 (Parcel ID: 01-3114-035-2830) (Section 14, Township 53S, Range 41E). The subject property is located in a generally residential area of Northwest Miami, Florida. Refer to Appendix 8.1, Figure 1 attached to this report for the Site Location Plan. Please refer to the recent aerial photograph (Appendix 8.2, Figure 2). The assessment included visual observations of the subject property and adjacent properties, reviews of historical land use and regulatory records/database listings. The ESA was performed in accordance with the ASTM standard E-1527-21 and the Environmental Protection Agency's (EPA) All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312).

### Phase I ESA

The site inspection was conducted by HAI on June 13, 2024, to assess the environmental condition of the subject property. The subject property consists of a vacant parcel of property 5,300 square feet in size. The subject property was undeveloped at the time of the visit. No storm drains were observed at the subject property. No pad-mounted electrical transformers were observed at the subject property. Small quantities of solid waste were present at the time of inspection but are not considered a REC. No monitoring wells were observed at the subject property.

No Underground Storage Tanks (USTs), Above Ground Storage Tanks (ASTs) or indications of other underground structures that would be considered a recognized environmental condition were noted on the subject property. No evidence of stressed vegetation, unnatural fill areas, ponds, or lagoons was noted on-site during our site visit. No obvious signs of contamination were noted at the subject property. Additionally, no evidence for the potential of vapor-phase contaminants from on-site sources to intrude into the subject property was observed during the site visit.

HAI contracted Environmental Data Resources, Inc. (EDR) to compile regulatory information for the subject site and vicinity. Additionally, HAI visited the Miami-Dade County Department of Regulatory and Economic Resources-Division of Environmental Resources Management (DERM) online database and the Florida Department of Environmental Protection (FDEP) online database to obtain and review the regulatory files for the subject site and off-site facilities identified as Recognized Environmental Conditions (RECs). The subject property or abutting properties are not identified in the EDR report, the Dade County DERM or the FDEP files.

There are off-site facilities identified with soil and/or groundwater contamination within a one-mile radius of the subject property. Based on the regulatory information reviewed; and the distance and/or direction of these listed facilities from the subject property, they are not considered a recognized environmental condition (REC). Additionally, no evidence for the potential of vapor-phase contaminants from off-site sources to intrude into the subject property was observed during the site visit.

**HAI has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of the subject property 1544 Northwest 58<sup>th</sup> Terrace, Miami, Florida 33142 (Parcel ID: 01-3114-035-2830) (Section 14, Township 53S, Range 41E). Any exceptions to, or deletions from, this practice are described in Section 7 of this report. This assessment has revealed no Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), Historic Recognized Environmental Condition (HREC), de minimis conditions and/or significant data gaps in connection with the subject property. Therefore, no additional assessment is recommended at this time.**

This summary is presented for convenience only. While the summary is an integral part of the report, it should not be used in lieu of reading the entire report including the appendices.

## 2.0 INTRODUCTION

### 2.1 Purpose

The purpose of a Phase I ESA is to identify, to the extent feasible pursuant to the processes described herein, recognized environmental impairment in connection with the subject property. Our services were provided in an agreement with Ms. Dollila Pinkhasov of City of Miami Department of Housing and Community Development as permission to proceed. The Phase I ESA follows the ASTM standards E 1527-21 Standard Practice for Environmental Site Assessments and the EPA's All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312).

The purpose of this Phase I ESA was to identify Recognized Environmental Conditions (RECs) associated with the subject property. RECs are defined in ASTM Designation E 1527-21 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not a recognized environmental condition.

Other RECs defined in ASTM E 1527-21 are Historical REC (HRECs) and Controlled RECs (CRECs). HRECs are defined as condition—a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

CRECs are RECs resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

### 2.2 Special Terms and Conditions

There were no special terms or conditions other than those listed in this Assessment. Refer to Section 7.0 of this report for our limitations. HAI is not affiliated with the property owner, tenants,

or the buyer and seller of the subject property. HAI has no financial interest, or any other interest in the subject property.

### **2.3 User – Provided Information**

The client was provided a User Questionnaire regarding the subject property in accordance with ASTM Designation E 1527-21 and the EPA's All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312). Refer to Appendix 8.6 for a copy of the information provided by the Client. The Client requested this Phase I ESA to fulfill due diligence requirements associated with the real estate transaction of the subject property, and to qualify for one of the three LLP's under CERCLA as required by ASTM Designation E 1527-21. The client indicated that they were not aware of any environmental liens or Activity and Use Limitations (AULs) in connection with the subject property; nor did the Client possess any specialized knowledge or experience pertaining to the subject property. Furthermore, the Client had no knowledge of a significantly reduced purchase price due to environmental conditions associated with the subject property and/or adjoining properties. A search of land title records was not included as part of the scope of activities for this Phase I ESA, and one was not provided by the Client.

### 3.0 SITE DESCRIPTION

#### 3.1 Location and Legal Description

The subject property is located at 1544 Northwest 58<sup>th</sup> Terrace, Miami, Florida 33142 (Parcel ID: 01-3114-035-2830) (Section 14, Township 53S, Range 41E). The subject property is located in a generally residential area of Northwest Miami, Florida. Refer to Appendix 8.1, Figure 1 attached to this report for the Site Location Plan. Please refer to the recent aerial photograph (Appendix 8.2, Figure 2). The legal description of the subject property was not available at the time of this report. The following is an abbreviated legal description from the Miami-Dade County Property Appraiser:

ORANGE HEIGHTS PB 14-62 LOT 13 BLK 15 LOT SIZE 50.000 X 106 OR 22455-4651 0504 3

#### 3.2 Site and Vicinity Characteristics

##### **On-Site Inspection:**

The site inspection was conducted by HAI on June 13, 2024, to assess the environmental condition of the subject property. The subject property consists of a vacant parcel of property 5,300 square feet in size. The subject property was undeveloped at the time of the visit. No storm drains were observed at the subject property. No pad-mounted electrical transformers were observed at the subject property. Small quantities of solid waste were present at the time of inspection but are not considered a REC. No monitoring wells were observed at the subject property.

No Underground Storage Tanks (USTs), Above Ground Storage Tanks (ASTs) or indications of other underground structures that would be considered a recognized environmental condition were noted on the subject property. No evidence of stressed vegetation, unnatural fill areas, ponds, or lagoons was noted on-site during our site visit. No obvious signs of contamination were noted at the subject property. Additionally, no evidence for the potential of vapor-phase contaminants from on-site sources to intrude into the subject property as observed during the site visit.

##### **Off-Site Inspection:**

The subject property is located in a generally residential area of Northwest Miami, Florida. A recent aerial photograph (Appendix 8.2, Figure 2) shows the local land use proximal to the subject property. The following more specifically describes the nearby properties.

### North

The north side of the subject property is bordered by Northwest 58<sup>th</sup> Terrace. Then follows an extended residential area.

### South

The south side of the subject property is bordered by a single-family home. Then follows Northwest 58<sup>th</sup> Street and an extended residential area.

### East

The east side of the subject property is bordered by a single-family home. Then follow several more single-family homes.

### West

The west side of the subject property is bordered by a single-family home. Then follow several more single-family homes.

## **3.3 Description of Improvements**

The subject property is currently undeveloped and exists as a vacant parcel. Water and sewer services are available in the area of the subject property from the local utility. Power is available in the area of the subject property from the FP&L.

## **3.4 Information Regarding Environmental Liens**

No knowledge of environmental liens recorded against the subject property was reported to HAI.

## **3.5 Current Uses of the Subject property**

The subject property is currently undeveloped and exists as a vacant parcel.

### 3.6 Past Uses of the Subject property and Adjoining Properties

A review of aerial photographs and city directories were used to determine past uses of the subject site. Aerial photographs of the subject site were inspected for the years 1940, 1951, 1961, 1968, 1973, 1978, 1985, 1991, 1994, 1998, 1999, 2007, 2010, 2013, 2016, and 2019. City Directories were reviewed for the years 1923 through 2020. United States Topographic Maps were reviewed for 1950, 1962, 1969, 1988, 1990, 1994, 2012, 2015, 2018 and 2021. Sanborn Fire Insurance maps were reviewed from 1940 and 1951. No pertinent information was obtained from the historical topographic maps or Sanborn maps that would indicate an environmental risk.

1940 The subject property is undeveloped. To the north the subject property is bordered by Northwest 58<sup>th</sup> Terrace. The parcels abutting the subject property to the south, to the east and to the west are developed with single-family homes.

1951 The subject property is now developed with a single-family home. The parcels abutting the subject property to the south, to the east and to the west are developed with single-family homes. The general area is developed as residential with single-family homes.

1961 No significant changes are present to the subject property and the surrounding area, except that the parcel abutting the subject property to the west is now developed with an apartment building.

1968 No significant changes are present to the subject property and the surrounding area.

1973 No significant changes are present to the subject property and the surrounding area.

1978 No significant changes are present to the subject property and the surrounding area.

1985 No significant changes are present to the subject property and the surrounding area.

1991 No significant changes are present to the subject property and the surrounding area.

1994 No significant changes are present to the subject property and the surrounding area.

1998 No significant changes are present to the subject property and the surrounding area.

- 1999 No significant changes are present to the subject property and the surrounding area.
- 2007 The building previously existing at the subject property is now razed. The parcel abutting the subject property to the south is now developed with a single-family home as it exists today. The apartment building previously existing at the parcel abutting the subject property to the west is now razed.
- 2010 No significant changes are present to the subject property and the surrounding area.
- 2013 No significant changes are present to the subject property and the surrounding area.
- 2016 No significant changes are present to the subject property and the surrounding area.
- 2019 No significant changes are present to the subject property and the surrounding area, except that the parcel abutting the subject property to the west is now developed with a single-family home as it exists today.

### **City Directories**

City Directories for the subject property were reviewed for the years 1923-2020. Listings are as follows:

1923-1940	Not listed
1941-2014	Residential Listings
2015-2020	Not listed

### **3.7 Current Uses of Adjoining Properties**

The properties adjoining the subject property are developed as follows: The north side of the subject property is bordered by Northwest 58<sup>th</sup> Terrace. The south side of the subject property is bordered by a single-family home. The east side of the subject property is bordered by a single-family home. The west side of the subject property is bordered by a single-family home.

## 4.0 RECORDS REVIEW

### 4.1 Standard Environmental Record Sources Federal, State and County

HAI contracted Environmental Data Resources, Inc. (EDR) to compile regulatory information for the subject property and vicinity from documentation provided by the Miami-Dade County Department of Regulatory and Economic Resources-Division of Environmental Resources Management (DERM), the Florida Department of Environmental Protection (FDEP) and the United States Environmental Protection Agency (EPA). The review was intended to aid in identifying contaminated sites within a one-mile radius of the site. This review was conducted using the suggested search radii in accordance with the ASTM 1527-21 standard and the EPA's All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312). The EDR report is included in Appendix 8.3. The following is a summary of the report.

#### A. United States EPA (Environmental Protection Agency)

##### **Federal National Priorities List (NPL)**

The National Priorities List (NPL) is the Environmental Protection Agency (EPA) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program.

The subject property is not listed as an NPL facility. One NPL facility is listed within a 1.0 mile radius of the subject property. Based on the distance and/or direction of the listed facility from the subject property, it is not considered a recognized environmental condition (REC).

##### **Federal Delisted NPL Sites**

The NPL Delisted Sites are sites previously on the NPL list which have been remediated and have been removed from the EPA's priority list.

The subject property is not listed as a Delisted NPL facility. No Delisted NPL facilities are listed within a 1.0 mile radius of the subject property.

##### **Federal CERCLIS List**

The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list is a compilation of sites that the EPA has investigated or is currently investigating for a release or threatened release of hazardous substances.

The subject property is not listed as a CERCLIS facility. No SEMS facilities are listed within a 0.50 mile radius of the subject property.

**Federal CERCLIS-NFRAP Sites List**

The CERCLIS No Further Remedial Action Planned (NFRAP) List is a compilation of sites that the EPA has investigated and has determined that the facility does not pose a threat to human health or the environment, under the CERCLA framework.

The subject property is not listed as a CERCLIS-NFRAP facility. No SEMS-Archive facilities are listed within a 0.25 mile radius of the subject property.

**Federal Resource Conservation and Recovery Act (RCRA) CORRACTS Facilities List**

The EPA Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Treatment, Storage, and Disposal (TSD) database is a compilation by the EPA of reporting facilities that treat, store, or dispose of hazardous waste. The CORRACTS database is the EPA's list of treatment, storage, or disposal facilities subject to corrective action under RCRA.

The subject property is not listed as a RCRA CORRACTS TSD facility. No RCRA CORRACTS TSD facilities are listed within a 1.0 mile radius of the subject property.

**Federal Resource Conservation and Recovery Act (RCRA) Non-CORRACTS TSD Facilities List**

The RCRA TSD database is a compilation by the EPA of reporting facilities that treat, store, or dispose of hazardous waste.

The subject property is not listed as a RCRA-TSD facility. No RCRA-TSD facilities are listed within a 0.50 mile radius of the subject property.

**Federal RCRA Generator List**

The RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Generators database is a compilation by the EPA of reporting facilities that generate hazardous waste.

The subject property is not listed as a RCRA Generator facility. Two Very Small Quantity Generator facilities (VSQG) are listed within a 0.25 mile radius of the subject property. No violations reported. Based on our regulatory review and the distance and/or direction of the listed facilities from the subject property, they are not considered a recognized environmental condition (REC). No Small Quantity Generator facilities (SQG) or Large Quantity Generator facilities (LQG) are listed within a 0.25 mile radius of the subject property.

**Federal RCRA Non-Generator List**

The RCRA Non-Gen database is a compilation by the EPA of reporting facilities that do not presently treat, store, or dispose of hazardous waste.

The subject property is not listed as a RCRA Non-Gen facility. No RCRA Non-Gen facilities are listed within a 0.25 mile radius of the subject property.

**Federal Institutional Control/Engineering Control Registries**

The Federal Institutional Control/Engineering registries is a database used to record institutional controls, land use restrictions, and engineering control requirements on contaminated properties.

No Federal Institutional Control or Engineering Controls are listed for the subject property. No Federal Institutional Control or Engineering Controls are listed within a 0.5 mile radius of the subject property.

**Federal Emergency Response Notification System (ERNS)**

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported release of oil or hazardous substances.

The subject property is not listed as an ERNS facility. No ERNS sites are listed within a 0.125 mile radius of the subject property.

**B. State Records - Florida Department of Environmental Protection (FDEP)**

**State and Tribal CERCLIS-Equivalent List**

The State and Tribal CERCLIS-equivalent list sites that the state environmental regulatory agency has or plans to investigate because the sites are or potentially are contaminated, and therefore, present a possible threat to the human health and the environment.

The subject property is not listed as a State or Tribal CERCLIS facility. No State or Tribal CERCLIS-Equivalent facilities are listed on EDR Report.

**State and Tribal Solid Waste/Landfill Facilities (SWLF)**

Databases of Solid Waste/Landfill facilities are maintained by either the state, county, or local environmental regulatory agency.

The subject property is not listed as a SWLF facility. No SWLF facilities are listed within a 0.50 mile radius of the subject property.

**State And Tribal Aboveground Storage Tank (AST) List**

This is a database of facilities that maintain ASTs. This list is typically maintained by either the state, county, or local environmental regulatory agency.

The subject property is not listed as an AST facility. One AST facility is listed within a 0.25-mile radius of the subject property. This facility was reported with leaks. Based on our regulatory review and the distance and/or direction of the listed facility from the subject property, it is not considered a recognized environmental condition (REC).

**State and Tribal Leaking Aboveground Storage Tank (LAST) List**

This is a database of facilities that maintain LASTs. This list is typically maintained by either the state, county, or local environmental regulatory agency.

The subject property is not listed as a LAST facility. One LAST facility is listed within a one-quarter mile radius of the subject property. Based on our regulatory review and the distance and/or direction of the listed facility from the subject property, it is not considered a recognized environmental condition (REC).

**State and Tribal Underground Storage Tank (UST) List**

This is a database of facilities that maintain underground storage tanks. This list is typically maintained by either the state, county, or local environmental regulatory agency.

The subject property is not listed as an Underground Storage Tanks (USTs) site. Ten UST facilities are listed within a 0.25 mile radius of the subject property. Based on our regulatory review and the distance and/or direction of the listed facilities from the subject property, they are not considered a recognized environmental condition (REC).

**State and Tribal Leaking Underground Storage Tank (LUST) List**

This is a database of facilities that have reported leaks of hazardous substances from underground storage tanks. This list is typically maintained by either the state, county, or local environmental regulatory agency.

The subject property is not listed as a LUST facility. Ten FL LUST facilities are listed within a 0.5 mile radius of the subject property. Of the ten listed facilities, five are remediated or require no cleanup and five are undergoing remediation. Based on our regulatory review and the distance and/or direction of the listed facilities from the subject property, they are not considered a recognized environmental condition (REC).

**State DRYCLEANERS List**

This database, maintained by the FDEP, provides information about permitted dry cleaner facilities.

The subject property is not listed as a DRYCLEANERS facility. No DRYCLEANERS facilities are listed within a 0.25 mile radius of the subject property.

**State PRIORITYCLEANERS List**

This is a priority ranking list of dry-cleaning facilities with documented contamination that are eligible for the state-funded cleanup under the Dry Cleaning Solvent Program.

The subject property is not listed as a PRIORITYCLEANERS facility. No PRIORITYCLEANERS facilities are listed within a 0.5 mile radius of the subject property.

**Facility Index System/Facility Registry System (FINDS) List**

Finds contains both facility information and “pointers” to other sources that contain more detail.

The subject property is not listed as a FINDS facility. No FINDS facilities are listed within a 0.5 mile radius of the subject property.

**State and Tribal Institutional Control/Engineering Control Registries**

This is a database maintained by either the state, county, or local environmental regulatory agency which records institutional controls, land use restrictions, and engineering control requirements on contaminated properties.

No State Institutional Control or Engineering Controls are listed for the subject property. No State Institutional Control or Engineering Controls are listed within a 0.5 mile radius of the subject property.

### **State and Tribal Voluntary Cleanup Sites**

This is a database maintained by either the state, county, or local environmental regulatory agency which lists Voluntary Cleanup Sites.

The subject property is not listed as a Voluntary Cleanup Site. No FL Voluntary Cleanup Sites are listed within a 0.25 mile radius of the subject property.

### **State and Tribal Brownfields Sites**

This is a database maintained by either the state, county, or local environmental regulatory agency which lists Brownfields Sites. Brownfields Sites are generally abandoned, underutilized commercial and/or industrial properties where expansion or redevelopment is complicated by actual or perceived environmental contamination.

The subject property is located within the Miami EZ Expansion Brownfields Area. The subject property is not listed as a Brownfields site. Two additional Brownfields Areas are listed within a 0.50 mile radius of the subject property: Miami Brownfields Area and Model City Brownfields Area. Two Brownfields sites are listed within a 0.50 mile radius of the subject property: Gipson Service Station at 1501 NW 62<sup>nd</sup> Street (at a 0.218 mile radius of the subject property) and Former Shamrock Supreme Gas Station at 6200 NW 17<sup>th</sup> Avenue (at a 0.244 mile radius of the subject property). Based on our regulatory review and the distance and/or direction of the listed facility from the subject property, it is not considered a recognized environmental condition (REC).

### **C. County Records**

The subject property is not identified in the EDR. Two HWS sites, three Industrial Waste (IW) permit sites and one HAZ Waste site are listed within a 0.25 mile radius of the subject property. Eleven facilities awaiting funding for cleanup (FL DWM CONTAM) and one Responsible Party (RESP) site are listed within a 0.5 mile radius of the subject property. Based on the distance and/or direction of the listed facilities from the subject property, they are not considered a recognized environmental condition (REC).

## **D. EDR Proprietary Records**

### **Manufactured Gas Plants**

The subject property is not listed as a manufactured gas plant. No manufactured gas plant facilities are listed within a one-mile radius of the subject property.

### **EDR Historical Auto Stations**

The subject property is not listed as a historical auto station. No historical auto stations are listed within a 0.125 mile radius of the subject property.

### **EDR Historical Cleaners**

The subject property is not listed as a historical cleaner. Five historical cleaner facilities are listed within a 0.125 mile radius of the subject property. These facilities were not dry cleaners. Based on the distance and/or direction of the listed facilities from the subject property, they are not considered a recognized environmental condition (REC).

## **E. Orphan Summary**

Although exact locations of orphan sites are frequently unknown, HAI attempts to evaluate whether activities conducted by these properties have the potential to cause an environmental impact on the subject property. Such evaluations consist of attempting to map out the orphan site, reviewing street names in an effort to learn whether the street on which the site is located lies within the radius of the subject property, a drive-by reconnaissance of the site (if possible), and the review of available information from governmental agencies regarding the facility. One orphan site is listed: Biscayne Aquifer at 58<sup>th</sup> Street. Based on the distance and/or direction of the listed facility from the subject property, it is not considered a recognized environmental condition (REC).

## **4.2 Potential for Vapor Migration**

HAI evaluated the potential of vapor-phase contaminants from on-site or off-site sources to migrate and possibly intrude into the subject property. The evaluation was based upon the available regulatory information obtained from the EDR report and reviewed from the county, state, and federal environmental agency databases as described in Section 4.1. Based upon the findings described in Section 4.1 of this report, historical and/or current Vapor Intrusion

Concerns were not identified for the subject property. Based upon this information, HAI believes that further assessment is not warranted at this time for the subject property.

### **4.3 Physical Setting Source**

A consideration of surface and subsurface drainage is of interest because they provide an indication of the direction that contaminants, if present, could be transported. HAI reviewed the following information in regard to the hydrogeology of the site and surrounding area:

Wellfield Protection Area Map for Miami-Dade County, provided by the Metropolitan Miami-Dade County Department of Environmental Resources Management, revised in September 2008.

A review of a United States Geological Survey (USGS) topographic map of the area indicates that the site and surrounding area are generally flat with surface elevations of approximately eleven feet National Geodetic Vertical Datum (NGVD). Storm water generated on-site infiltrates to the subsurface in green areas.

### **4.4 Geology**

The sediments of south Florida are dominated by limestone and dolostone. The study area is underlain by at least 11,800 feet of these carbonate sediments. Only the section of rocks normally encountered when water wells are drilled, generally to a depth of less than 200 feet, is considered in the following discussion of geology.

The Hawthorn Group (undifferentiated) consists of interbedded sand, silt, clay, dolostone, and limestone. All of the lithological components are interbedded and intermixed. This group is intermixed throughout with phosphate, generally in the form of sand-sized grains. In this study area the top of the group consists of sand and clay and forms the base of the Biscayne aquifer. The lower part of the group consists of soft or hard, sandy, phosphatic dolostone or limestone. The group attains a thickness of more than 900 feet in the study area. The upper part of the group acts as a confining unit for the Floridan aquifer system, which yields water to flowing wells in the study area but is not used because the water is saline.

In some areas the Hawthorn Group is overlain by a thin layer of limy sand containing scattered phosphate grains and small quantities of shell material. This bed is probably equivalent to the

Tamiami Formation, but not much information is available concerning this formation in this study area. Where it occurs in the study area, it probably forms the base of the Biscayne aquifer.

The Caloosahatchee Formation may occur as scattered remnants as much as 25 feet thick in the study area, but little definite information is available concerning the occurrence of this formation in the area. The formation consists of shells, sand, and some limestone and sandstone.

The Fort Thompson Formation, which consists of interbedded limestone, sand, and shells, is one of the most productive units within the Biscayne aquifer. It averages 50 to 70 feet in thickness and thickens to the east. It typically consists of alternating freshwater and marine sediments, which generally are permeable. The limestone beds in the Fort Thompson Formation can be cavernous and interconnected, thus providing channels through which water can flow.

The Anastasia Formation, a sandy, shelly limestone unit, extends along the Atlantic coast more than 150 miles to the north of this study area. Although it does not occur at the surface anywhere in the survey area, it forms a major part of the Biscayne aquifer in coastal areas, where it is much as 120 feet thick. This unit typically has beds of marine limestone, consisting mainly of cemented whole and broken shells (coquina). These beds are extremely permeable. Because they are relatively close to the surface and in close proximity to the ocean, however, the water contained in them can be saline.

Key Largo Limestone merges laterally with the Anastasia Formation and with Miami Limestone in the southern and east-central parts of the survey area. This formation is at the surface throughout the upper keys, but in this survey area it is generally below the surface. It consists of hard limestone derived from coral, algae, and some shells. It is as much as 60 feet thick in the survey area. It is essentially a fossil reef, which formed during a period of higher Pleistocene sea level. It typically is very porous and is a very prolific water-producing part of the Biscayne aquifer.

Miami Limestone is at or near the surface in almost all of the survey area. This formation is a soft, oolitic limestone that is generally less than 40 feet thick. It characteristically contains large quantities of ooliths, which are small, spherical particles formed when calcite or aragonite was deposited in concentric layers around a nucleus of some type. Miami Limestone is considered to be a part of the Biscayne aquifer. It is a good source of water, although it yields less water than the underlying formations and does so less easily. (Excerpted from NRCS Soil Survey, Dade County, Florida).

## **4.5 Hydrology**

The Biscayne aquifer of the surficial aquifer system provides copious quantities of water to wells in the study area. It extends from the surficial material near or at the surface to a depth of almost 200 feet in the northeast corner of the county. The base of the aquifer is generally considered to be the deepest porous limestone bed in the section above the relatively impermeable sand, silt, and clay of the Hawthorn Group or "tight" sand in the Tamiami Formation. The water in the aquifer begins as rainfall, which percolates into the sand or limestone at the surface and flows by gravity to the water table, where it can be tapped by wells. Most wells that are not municipal or commercial are less than 100 feet deep and have casing that extends from the surface to below the water table. Many commercial or municipal wells are 100 to 200 feet deep. The lower parts of all the wells are left uncased in the limestone or shell beds. The water is derived from these beds. The Biscayne Aquifer is developed as the main source of potable drinking water in the South Florida area. It is anticipated that the groundwater level at the site is mainly subject to seasonal rainfall. The subject property is not located within the influence zone of a Miami-Dade County Public Drinking Water Wellfield Protection Area. This portion of the Biscayne Aquifer is probably affected by saltwater intrusion. Groundwater flow direction is likely southeast.

## **5.0 INFORMATION FROM SITE RECONNAISSANCE**

### **5.1 Hazardous Substances in Connection with Identified Uses**

No quantities of hazardous substances or petroleum products are generated or stored on the subject property. No hazardous wastes were stored or generated on the subject property.

### **5.2 Hazardous Substance Containers and Unidentified Substance Containers**

No hazardous substance or petroleum product containers and/or unidentified substance containers (i.e., drums) were located on the subject property.

### **5.3 Storage Tanks**

No underground storage tanks (USTs), aboveground storage tanks (AST) or other mechanical structures that would be considered a recognized environmental condition were noted on the subject property.

### **5.4 Indication of PCB's**

No pad-mounted electrical transformers are noted at the subject property.

### **5.5 Indication of Solid Waste Disposal**

Small quantities of solid waste (trash) was observed on the subject property and is not considered a REC.

### **5.6 Source of Potable Water**

Information obtained during this assessment indicated that potable water is available in the area of the subject property by the local municipal utility.

### **5.7 Sewage Disposal System**

Information obtained during this assessment indicated that sanitary sewer services is available in the area of the subject property by the local municipal utility.

## **5.8 Storm Water Runoff**

No Storm water catch basins were noted on subject site. Stormwater infiltrates into the subsurface in green areas on the subject property. It is anticipated that storm water from the adjacent properties would infiltrate into the subsurface in unpaved areas and/or move as sheet flow across paved and other impervious surfaces into their off-site storm drains. Ground surface at adjacent properties was relatively flat and storm water runoff from these properties appeared to have a low potential to impact the subject site.

## **5.9 Spills, Incidents, or Violations**

No spills, incidents, or violations were noted for the subject property.

## **5.10 Source of Fuel for Heating and Cooling**

No source of fuel for heating or cooling was noted on the subject property.

## **5.11 Floor Drains, Sumps, or Suspect Odors**

No floor drains or sumps were observed at the subject property. No suspect odors indicating hazardous wastes and/or petroleum products had been discharged at the subject property were noticed during the site visit.

## **5.12 Stains, Corrosion, or Stressed Vegetation**

No obvious indications of stains on surfaces (i.e., pavement, grassed areas, etc.) or corrosion of piping were observed during the site visit to indicate the subject property had been impacted by hazardous materials or petroleum products. No obvious signs of the presence of stressed vegetation were observed during the site visit to indicate the subject property had been impacted by hazardous materials or petroleum products.

## **5.13 Pits or Lagoons**

No pits (used for the disposal of hazardous wastes) or lagoons were observed on the subject property.

#### **5.14 Oil/Water Separators**

No evidence of oil/water separators was observed at the subject property.

#### **5.15 Evidence of Landfill, Dumping, Disturbed Soils, Direct Burial Activity, Injection Wells, or other Disposal Activities**

No evidence of landfill, dumping, disturbed soils, direct burial activity, injection wells, or other disposal activities was observed at the subject property.

#### **5.16 Evidence of Surface Impoundments or Holding Ponds**

No evidence of surface impoundments or holding ponds (used to temporarily store hazardous waste) was observed at the subject property.

#### **5.17 Evidence of Air Emissions or Wastewater Discharges**

No evidence of air emissions or wastewater discharges was observed at the subject property.

#### **5.18 Evidence of Monitoring Wells, Piezometers, or other Surface Monitoring Devices**

No evidence of monitor wells, piezometers, or other surface monitoring devices were observed at the subject property.

#### **5.19 Evidence of Environmental Assessment or Remedial Activities**

No evidence of environmental assessment or remediation activities was observed at the subject property.

#### **5.20 Evidence of Leachate or Seeps**

No evidence of leachate or seeps was observed at the subject property.

### **5.21 Evidence of Areas of Chemically Distressed, Discolored, or Stained Vegetation**

No evidence of areas of chemically distressed, discolored, or stained vegetation was observed at the subject property.

### **5.22 Evidence of Chemical Spills or Releases**

No evidence of chemical spills or releases was observed at the subject property.

### **5.23 Evidence of Groundwater or Surface Water Contamination**

No evidence of groundwater or surface water contamination was observed at the subject property.

### **5.24 Evidence of Oil or Gas Well Exploration, Abstraction, or Refinery Activities**

No evidence of oil or gas well exploration, abstraction, or refinery activities was observed at the subject property.

### **5.25 Evidence of Farm Waste Concerns such as Feed Lot Spoils or Manure Stockpiles**

No evidence of farm waste concerns such as feed lot spoils or manure stockpiles was observed at the subject property.

### **5.26 Evidence of Prolonged Use or Misapplication of Pesticides, Herbicides, Soil Conditioners, or Fertilizers**

No evidence of prolonged use or misapplication of pesticides, herbicides, soil conditioners, or fertilizers was observed at the subject property.

### **5.27 Evidence of Discharges, Leachate, Migration, or Runoff of Potential Contaminants from an Off-Site Source onto the Subject property**

No evidence of discharges, leachate, migration, or runoff potential contaminants from an off-site source onto the subject property was observed at the subject property.

## **5.28 Evidence of On-Site Railroad Activity**

No evidence of on-site railroad activity was observed at the subject property.

## **5.29 Evidence of Potential Vapor Migration**

No evidence for the potential of vapor-phase contaminants from on-site sources to migrate and possibly intrude into the subject property was observed during the site visit.

## **5.30 Other Conditions of Concern**

### **5.30.1 Asbestos**

An asbestos survey was not conducted as part of this assessment as no buildings exist on the subject property.

### **5.30.2 Radon**

A radon survey was not conducted as part of this assessment. Due to the geology of Miami-Dade County, the subject property is located in Zone 2 (Moderate Potential (between 2 and 4 pCi/L)) of the EPA Radon Map.

### **5.30.3 Lead Paint**

A lead-based paint survey was not conducted as part of this assessment as no buildings exist on the subject property.

### **5.30.4 Wetlands**

A wetlands survey was not conducted as part of this assessment. No obvious wetland or low-lying areas were noted during the site visit.

### **5.30.5 Rock mining**

The subject property has not been utilized as a rock mining operation. In addition, no rock mining operations were identified within a quarter-mile radius of the site.

### **5.30.6 Previously Conducted Phase I ESA Report**

HAI was not provided with a previously conducted Phase I ESA.

### **5.30.7 Interview with Property Key Site Contact**

HAI interviewed Ms. Dollila Pinkhasov regarding the on-site operations and history of the subject property.

- Ms. Pinkhasov was unaware of chemicals or hazardous substances spilled at the subject property.
- Ms. Pinkhasov was unaware of any current or past notices of violation regarding the subject property.
- Ms. Pinkhasov was unaware of any recognized environmental conditions associated with the subject property, adjoining or surrounding properties.
- Ms. Pinkhasov was unaware of any existing USTs on the subject property.

### **5.30.8 Documentation of Data Gaps**

No data gaps were encountered when reviewing the aerial photographs. HAI provided sufficient information to meet the objective of developing the history of previous uses for the subject property and surrounding areas.

In accordance with ASTM E 1527-21 and EPA “AAI Rule”, a reasonable attempt was made to interview at least one staff member of any one of the following types of local government agencies.

- The Fire Department (emergency services) was contacted. However, no relevant information regarding environmental conditions was available.
- The Health Department was contacted. No relevant information regarding environmental conditions was available.
- The Dade County Water and Sewer Authority Department was contacted. It was documented that this area of Miami is supplied by water and sewer services.

### **5.30.9 Environmental Liens, Activity and Use Limitations (AUL)**

AULs are one indication of a past or present release of a hazardous substance or petroleum products. AULs are legal or physical description on the use of, or access to, a site or facility: to reduce and/or eliminate potential exposure to hazardous substances or petroleum products to soil or groundwater on the subject property to prevent activities that could interfere with the effectiveness of a response action or cleanup activity.

Based on the review of the FDEP Institutional Controls/Engineering Controls (IC/EC) Registry, no evidence of AULs was found for the subject property. However, please note that the scope of services did not include a title records search, which under ASTM 1527-21 is the responsibility of the User. The Client was not aware of any environmental liens or AULs associated with the subject property.

### **5.30.10 Deviations & Additional Services**

No deviations from the ASTM Designation E 1527-21 or the EPA's All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312) were required to complete this Phase I ESA.

## 6.0 CONCLUSIONS AND RECOMMENDATIONS

Hydrologic Associates USA, Inc. (HAI) was contracted by Ms. Dollila Pinkhasov of City of Miami Department of Housing and Community Development to conduct a Phase I Environmental Site Assessment of the subject property located at 1544 Northwest 58<sup>th</sup> Terrace, Miami, Florida 33142 (Parcel ID: 01-3114-035-2830) (Section 14, Township 53S, Range 41E). The subject property is located in a generally residential area of Northwest Miami, Florida. Refer to Appendix 8.1, Figure 1 attached to this report for the Site Location Plan. Please refer to the recent aerial photograph (Appendix 8.2, Figure 2). The assessment included visual observations of the subject property and adjacent properties, reviews of historical land use and regulatory records/database listings. The ESA was performed in accordance with the ASTM standard E-1527-21 and the Environmental Protection Agency's (EPA) All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312). Any exceptions to or deletions from the Standard Practice are described and itemized in the following section of this Report.

### 6.1 Opinions and Findings

The site inspection was conducted by HAI on June 13, 2024, to assess the environmental condition of the subject property. The subject property consists of a vacant parcel of property 5,300 square feet in size. The subject property was undeveloped at the time of the visit. No storm drains were observed at the subject property. No pad-mounted electrical transformers were observed at the subject property. Small quantities of solid waste were present at the time of inspection but are not considered a REC. No monitoring wells were observed at the subject property.

No Underground Storage Tanks (USTs), Above Ground Storage Tanks (ASTs) or indications of other underground structures that would be considered a recognized environmental condition were noted on the subject property. No evidence of stressed vegetation, unnatural fill areas, ponds, or lagoons was noted on-site during our site visit. No obvious signs of contamination were noted at the subject property. Additionally, no evidence for the potential of vapor-phase contaminants from on-site sources to intrude into the subject property was observed during the site visit.

HAI contracted Environmental Data Resources, Inc. (EDR) to compile regulatory information for the subject site and vicinity. Additionally, HAI visited the Miami-Dade County Department of Regulatory and Economic Resources-Division of Environmental Resources Management (DERM) online database and the Florida Department of Environmental Protection (FDEP)

online database to obtain and review the regulatory files for the subject site and off-site facilities identified as Recognized Environmental Conditions (RECs). The subject property or abutting properties are not identified in the EDR report, the Dade County DERM or the FDEP files.

There are off-site facilities identified with soil and/or groundwater contamination within a one-mile radius of the subject property. Based on the regulatory information reviewed; and the distance and/or direction of these listed facilities from the subject property, they are not considered a recognized environmental condition (REC). Additionally, no evidence for the potential of vapor-phase contaminants from off-site sources to intrude into the subject property buildings was observed during the site visit.

**HAI has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of the subject property 1544 Northwest 58<sup>th</sup> Terrace, Miami, Florida 33142 (Parcel ID: 01-3114-035-2830) (Section 14, Township 53S, Range 41E). Any exceptions to, or deletions from, this practice are described in Section 7 of this report. This assessment has revealed no Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), Historic Recognized Environmental Condition (HREC), de minimis conditions and/or significant data gaps in connection with the subject property. Therefore, no additional assessment is recommended at this time.**

## **7.0 LIMITATIONS**

### **7.1 Limitations and Exceptions of Assessment**

Document searches and site visit(s) were conducted as part of the assessment. This assessment follows ASTM standards E 1527-21 Standard Practice for Environmental Site Assessments and the EPA's All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312). This report also incorporates the requirements outlined in the ASTM standard E-1527-21. Not included in this report are assessments for Asbestos, Wetlands or Radon. Any additional exceptions to, or deletions from, this practice are described in this report.

While conducting the tasks and activities necessary to compile the results of this assessment, Hydrologic Associates USA, Inc. (HAI) has exercised reasonable efforts to employ the professional standards applicable in the industry today. Nevertheless, we cannot guarantee that our reviews of land use histories, interviews, etc. will necessarily yield complete or usable information or that this preliminary evaluation of the site conditions will reveal all possible sources of contamination.

HAI makes no warranties, expressed or implied, including without limitations, warranties as to merchantability or fitness for a particular purpose. HAI further assumes no risk or liability for loss of earnest monies or deposits involved in the purchase or sale of property due to delays in execution of the project nor do we assume any risks for existing conditions on the site.

### **7.2 Limiting Conditions and Methodology Used**

HAI performed a non-intrusive site visit, document search, and conducted interviews for this assessment. HAI has not conducted any sub-surface investigations or collected or analyzed any soil, surface, or ground-water samples as part of this assessment. Due to these and other limitations, this assessment will include the application of judgment to scientific principles. Certain results or recommendations of this work may be based on subjective interpretations. There can be no assurance that definitive or desired results will be obtained or that they are supportive of any given course of action. The information provided under this report shall not be construed as legal advice. Refer to the Appendix 8.4 for the Qualifications of Environmental Professionals Participating in the ESA.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

1544 NW 58 TERRACE  
MIAMI, FL 33142

#### COORDINATES

Latitude (North): 25.8286410 - 25° 49' 43.10"  
Longitude (West): 80.2236550 - 80° 13' 25.15"  
Universal Transverse Mercator: Zone 17  
UTM X (Meters): 577810.1  
UTM Y (Meters): 2856775.0  
Elevation: 11 ft. above sea level

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal NPL (Superfund) sites***

NPL: A review of the NPL list, as provided by EDR, and dated 02/29/2024 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

## **APPENDIX 8.4**

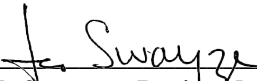

# **SIGNATURE PAGE AND QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS**

This Phase I Environmental Site Assessment has been prepared by personnel of Hydrologic Associates U.S.A., Inc., in accordance with ASTM Standard Practice E 1527-21 and the Environmental Protection Agency's (EPA) All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312).

Field Survey Conducted by:

Leo J. Swayze, Project Manager

Reviewed By:

**Environmental Professional Certification:**

I declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental professional as defined in § 312.10 of 40 .F.R. § 312” and 12.14.2. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards.

The Environmental Professional who directed this project has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. This report also incorporates the requirements outlined in the ASTM standard E-1527-21.

Project Manager

## **CURRICULUM VITAE**

Name: **James Theodore Miller, P.E.**

Born: 9/25/69  
Miami, Florida

Education: Miami Dade Community College  
Miami, Florida  
AA Building Construction Management, 1988-1990

Florida International University  
Miami, Florida  
BS Civil Engineering, 1990-1993

Expertise: Environmental Site Assessments and NEPA Hud Forms Part 58  
Assessment and Remediation of Contaminated Groundwater  
Aboveground/Underground Storage Tank Closures and  
Assessments.

Certification: Professional Engineer  
OSHA 40-hour training

Experience: Consulting Engineer, Miami, Fl 1993-2005  
- Intercounty Laboratories, Inc. 1993-1994  
- LAW Engineering, Inc. 1994-1997  
- Hydrologic Associates USA, Inc. 1997-Current

Participated in:

- Conducting Phase I and Phase II Environmental Property Assessments
- Conducting Aboveground/Underground Storage Tank Closures and Assessments
- Soil and Groundwater Assessment of Contaminated sites
- Design and implementation of contaminant Remediation Systems
- Collection, computation, and analysis of groundwater data throughout the State of Florida
- Collection, computation, and analysis of drinking water data throughout the State of Florida
- Collection, computation, and analysis of soil throughout the State of Florida.

- NEPA Hud Forms

St. Elizabeth Gardens (2017) -801 NE 33<sup>rd</sup> Street – Pompano Beach, FL

St. Andrews Tower 2700 NW 99<sup>th</sup> Avenue – Coral Springs, FL

Block 45 – 152 NW 8<sup>th</sup> Street – Miami, FL

Oakmonte Village – 8201 Stirling Road – Davie, FL

Marian Towers – 17505 N. Bay Road – Sunny Isles Beach, FL

Saratoga Crossings West – 1105 W. Dania Beach Blvd. – Dania Beach, FL

Saratoga Crossings East – 705 W. Dania Beach Blvd. – Dania Beach, FL

Professional  
Memberships:

Florida Association of Environmental Professional (FAEP)

## CURRICULUM VITAE

Name:        **Bradley Gerald Waller**

Born: August 13, 1949  
Minneapolis, Minnesota

Education:    Gustavus Adolphus College  
                  St. Peter, Minnesota  
                  Magna Cum Laude, 1971  
                  B.A. Biology and Chemistry (Pre Med)

University of Puerto Rico - Mayaguez  
Institute of Marine Science  
Biological Oceanography, 1971

University of Miami  
Institute of Marine Science  
Biological Oceanography, 1972-73

University of Miami  
Department of Architecture and Engineering  
Environmental Engineering, 1974-76

Expertise:    Applied Water-Quality Analysis  
                  Geochemistry of Ground Water and Surface Water  
                  Rainfall Chemistry  
                  Project Planning and Management  
                  Technical Report Writing and Review  
                  Hydrologic Effects of Water Management System in  
                  South Florida

Experience:   **Marine Biologist**  
                  *United States Environmental Protection Agency*  
                  *Lower Florida Estuary Study*  
                  Fort Lauderdale, Florida, 1971-72

Participated in:

- Monitoring the effects of sewage effluent on offshore coral reefs
- Monitoring the effects of thermal effluent on shallow bays

**Research Hydrologist/Hydrologist**

*United States Department of the Interior*

*Geological Survey - Water Resources Division*

*Miami, Florida, 1972-88*

Participated in:

- Determining the chemical and biological characteristics of the Everglades Basin
- Determining the effects of back pumping excess runoff on the shallow marshes in the Everglades
- Basic research on the chemistry of rainfall in South Florida
- Determining the water-quality characteristics of surface water in Broward County
- Determining the hydraulic and water-quality characteristics of Southwest Broward County
- Analyzing the long-term and areal variation in the chemistry of surface water and soil in Everglades National Park
- Planning the East Everglades Resources Planning Project for the U.S. Department of the Interior
- Supervised the technical investigations for the East Everglades Resources Planning Project (Everglades National Park Expansion Area).

These investigations included:

- Topographic mapping
- Determination of subsurface geology and aquifer characteristics
- Determination of long-term hydrologic conditions in rainfall, ground water and surface water
- Determination of the effects of land use on ground- and surface- water quality
- Determination of baseline water-quality conditions in ground water, surface water, bulk precipitation and bottom material
- Analysis of surface resistivity and borehole geophysical data to determine contamination of surficial aquifers
- Design and construction of a ground-water quality monitoring network for South Florida that will be utilized to determine existing and optimum wellfield operations
- Determining the effects of septic tank leachate on the ground-water system in Broward County, Florida
- Determining the effects of stormwater runoff on the unsaturated zone, soil profile, and shallow water table in South Florida

- Analysis of the 1980-82 drought on the water supplies in South Florida
- Analysis of the Dennis (1981) and Donna (1960) flood and the effectiveness of the water management system.
- Analysis of current and historical saltwater intrusion in the Biscayne Aquifer
- Determination of agricultural chemical contamination in a shallow, unconfined aquifer: network and well design
- Using Geographic Information Systems to evaluate contamination potential near wellfields and determine optimum water Management practices

**Principal Hydrologist**

*Hydrologic Associates U.S.A., Inc.*  
Miami, Florida, 1988-Present

Project Manager for:

- Projected and present flooding analysis of selected areas in South Florida
- Determination of the hydrologic characteristics of a large agricultural operation in Palm Beach County, Florida
- Environmental analysis of Southwest Broward County, Florida
- Water supply development for the Island of Cozumel, Quintana Roo, Mexico
- Proposed environmental impact of two large residential marinas in Cancun, Mexico
- Conducting and Supervising Phase I and Phase II Environmental Property Assessments
- Analysis of the hydrologic situation in South Dade County and adjacent wetlands.
- Geotechnical Investigations. Guantanamo Naval Base.
- Environmental impact of a destination report in Quintana Roo, Mexico.
- Compliance monitoring for south Dade agriculture packing houses and processing plants.
- Analysis of water levels, discharge and water management in the Northwest Wellfield Area, Dade County and adjacent wetlands.
- Environmental evaluation of a development site on Cozumel.
- Member of technical advisory committee (Hydrology) for the MUNISPORT dump coalition (Superfund site).
- Water Supply development at three sites along the Cancun - Tulum Development corridor
- Geohydrologic analysis of the Miccosukee Indian Reservation
- Hydrologic consulting regarding water supply on Grand Bahama Island
- Geohydrologic analysis of the Big Cypress Swamp Area
- Water supply development, environmental impact statement, and groundwater remediation at a destination resort in Curacao
- Analysis of the water resources of No Name Key and Big Pine Key

- Geohydrology and chemical characteristics of the Tutu Aquifer, St. Thomas U.S. Virgin Islands
- Hydrologic analysis of water levels in the southern Savannahs, Martin County
- Technical consultant to a citizens group reviewing development proposals in Martin County
- Wetland permitting - South Dade and Lake Istokpoga
- Hydrologic consultant to Florida Sugar Cane League, US Sugar Corporation, and Flosun Sugar
- Water Supply Development, Port au Prince, Haiti
- Environmental compliance for South Dade County Agricultural Community
- Hydrologic Consulting for Florida Wetlands Bank
- Hydrologic Consulting for Sunset Lakes, Imagination Farms, Old Cutler Bay, Don Acres, Miccosukee Housing at 40-mile bend, Merrick Park, Monarch Lakes and Sarah Park development sites
- Hydrologic analysis of Ludlam Drain Canal for water control structure design and flooding.
- Bal Harbour Shoppes remediation and site restoration
- Sombrero Golf Club in Marathon, seawater RO Unit (150,000 GPD) with 2 wells
- Hydrogeologic analysis and permitting of No Name Key rock mine
- Flood analysis for Carnival Cruise line building and four hotels on Miami Beach
- Monitoring and analysis of the oil fields in the Big Cypress Swamp National Preserve.
- Hydrologic design of proposal connection of the Key West Salt Ponds to the Atlantic Ocean
- Hydrologic and Water Resource consulting for the Miccosukee Tribe of Indians
- Hydrologic analysis of the water supply for the University of Miami properties
- Hydrologic analysis of the Pond Apple Slough restoration site, Broward County, Florida
- Mathematical analysis of exfiltration trenches used for stormwater disposal in Miami-Dade County (2 sites)
- Compliance monitoring and permitting of seven (7) C and D landfills and materials recycling facilities.
- Expert witness on numerous Federal and State cases involving water management practices, land condemnation, and history of water management in South Florida.
- Supervision of drilling for Broward County Saltfront, Miami Dade County (DERM and WASAD) Saltfront, Palm Beach County Saltfront, Newton/Everglades.
- Wellfield (WASAD), Big Pine Key Freshwater Lens, Key West Botanical Garden (Stock Island) John Pennecamp State Park Injection Wells, Hollywood Salinity barrier injection wells, Corps of Engineer S-332 retention ponds, North Miami saltfront, North Miami Beach wellfield water quality monitoring network and numerous test wells for permitting and siting Class V drainage wells.

## Bradley Gerald Waller/Page 5

Hydrologic Consultant to the Florida DOT

- Krome Avenue, Tamiami Trail, US Highway 1 18-mile stretch, Boca Chica wetland rehabilitation and C-111 redistribution of flow.
- Geohydrologic Evaluation and testing at the FPL Turkey Point proposed nuclear reactor sites 6 and 7.

### Water Supply Development in the Bahamas

- Nassau Blue Hills and Windsor Wellfields
- Bahamas Electricity Corporation – Blue Hills Power Plant
- Chub Cay
- Exuma – Georgetown and Emerald Bay
- Bimini
- Great Stirrup Cay, Berry Islands
- Great Guana Cay, Abaco
- West End, Grand Bahama

### Additional Experience:

- Lecturer in "Environmental remote sensing and photogrammetry" at the University of Miami, Department of Civil Engineering, 1978-83
- Detailed to U.S. Geological Survey headquarters to write supplemental 208 project proposal for Department of the Interior, National park Service, 9/76-10/76
- Testified as expert witness for U.S. Attorney's Office on water flow, water levels, water quality, and water quantity in the Everglades Basin (three cases), 1982-83
- Technical Advisor to the Governor's "Save the Everglades" Committee; a group of scientific, lay, and management leaders assigned to make recommendations to the Governor on restoring and maintaining the resources in the Everglades, 1985-86
- Southern Everglades Technical Advisory Committee (SETAC); oversees and coordinates multidiscipline technical studies in the southern Everglades; reports directly to Governor's Cabinet members, 1985-87
- Broward County Water Supply Advisory Board; advises County Commission on water-supply needs for the county, especially new municipal well fields, 1984-86
- Work Plan Steering Committee for the East Everglades Resources Planning Project; committee members reviewed and directed multidiscipline interagency technical studies in the east Everglades, 1977-81
- Vice Chair of Miami-Dade County Flooding Task Force 1999-Present
- Member of the Technical advisory committee (hydrology) for the Governor's Commission for Sustainable South Florida

### **HYDROLOGIC ASSOCIATES PUBLICATIONS**

- Preliminary analysis of the Hydrologic Situation in the levee 31N/C-111 and Taylor Slough Basin since the late 1970's, South Dade County, Florida
- Environmental Impact Statement for the Mayaluum Project Playa de Carmen, Quintana Roo, Mexico (Plus Appendices) (Manifestación de Impacto Ambiental del Proyecto Mayaluum)
- Preliminary analysis of the Hydrologic Situation near the Coulter Property at Northwest 41st Street and Snapper Creek Extension Canal. (Plus Appendices)
- Preliminary analysis of the Hydrologic and Geologic Characteristics of the Miccosukee Indian Reservation, Broward County, Florida (Plus Appendices)
- Water Resources Assessment and Supplemental Water Supply Development for Port au Prince Haiti (Évaluation Des Ressources en Eau et Développement D'un Approvisionnement D'eau Supplémentaire pour Port au Prince Haïti)
- Geohydrology of the Big Cypress Swamp Collier County, Florida (Plus Appendices)
- Summary of the Chemical Characteristics of Precipitation in Florida, 1965-1990, with special reference to Total Phosphorus
- Chronology of the history of water management in South Florida, 1821 to present (with citations)
- Geohydrologic Analysis and Water Quality Data for the Upper Tutu Aquifer, St. Thomas, Virgin Islands (Plus Appendices)
- Analysis of the Hydrologic Situation near the Wetlands Mitigation Bank in Pembroke Pines, Florida 1994
- Current and Proposed Hydrologic Conditions near the Sunset Lakes Development site, 1994
- Simulation of Stormwater Recharge to Groundwater, Miami Lakes, Florida 1998
- Hydrologic Effects of the proposed connection of Saltponds to the Atlantic Ocean, South Roosevelt Boulevard, Key West, Florida, 2000
- Simulation of Stormwater Recharge to Groundwater, International Corporate Park, Miami, Florida 2001
- Hydraulic Analysis of Lake Surprise, Monroe County, FL

### **TRAINING COURSES**

- Advanced Environmental Quality Analysis
- Geochemistry of Ground-Water Systems
- Statistical Analysis of Water Quality Data
- Applications of Geographic Information Systems
- Advanced Technical Report Writing

### **WORKSHOPS**

- Report Writing and Review
- Water-Quality Field Techniques
- Basic Ground-Water Hydraulics
- Ground-Water Geochemistry
- Technical Report Review

### **CONTINUING EDUCATION, UNIVERSITY OF MIAMI**

- Ecology
- Ecological Methods
- Freshwater Phycology
- Limnology
- Regional Planning Processes
- Photogrammetry and Aerial Photo Interpretation
- Remote Sensing of the Environment

### **ADDITIONAL EDUCATION**

- National Water Well Association Environmental Site Assessment, One Day Course

### Professional Memberships:

- American Geophysical Union - Hydrology Section
- American Water Resources Association
- National Water Well Association
- International Association of Hydrologic Sciences (IAHS)
- South Florida Association of Environmental Professionals

## CURRICULUM VITAE

**Name:** Leo James Swayze III

May 23, 1949  
Dover, New Jersey

**Education:** University of Miami  
Coral Gables, Florida  
B. Sc. Geology and Chemistry, 1972

University of Miami  
Rosenstiel School of Marine and Atmospheric Science  
Department of Marine Geology, 1972

First Lieutenant U.S. Army Chemical Corps  
Honorable Discharge, 1980

**Expertise:** Theoretical and applied ground-water hydrology  
Digital modeling of ground-water flow and solute transport  
Geochemistry of ground-water systems  
Assessment and Remediation of contaminated groundwater  
Aquifer Performance Testing  
Well Drilling

**Certification:** Registered Professional Geologist, Florida No. 327

**Experience:** Hydrogeologist  
United States Department of the Interior  
Geological Survey, Water Resources Division,  
Miami, Florida, 1974-88

### **Participated In**

LANDSAT satellite data collection system (DCS) for South Florida including collection, maintenance and analysis.

Hydrologic analysis of the Fahkahatchee Strand, Collier County, Florida

Operational analysis of a shallow injection well for disposal of reject water at the Rock Harbor Reverse-Osmosis water treatment plant, Key Largo, Florida

Feasibility study for the Long Key Reverse-Osmosis water treatment plant, aquifer analysis.

Geophysical and chemical analysis of boreholes in the Floridian Aquifer

Overall supervision of hydrologic investigations in Dade County, Florida, 1977-78

Overall supervision of hydrologic investigations in Palm Beach County, Florida, 1979-82

Project leader, Seepage of water under levees surrounding conservation areas in Dade and Broward Counties.

Project leader, Hydraulic analysis of eastern Palm Beach County, 1985-88

Project leader, Seepage of water from the L-31 Borrow Canal, 1988

Project leader, Hydraulic Analysis of the Everglades Aquifer

**Hydrologic Associates, U.S.A., Inc.  
Miami, Florida 1988-Current**

**Project Supervisor For:**

Flood analysis and statistical forecasting of high water levels in selected areas of South Florida

Hydrologic analysis of undeveloped agricultural areas in Palm Beach County

Technical consultation on water treatment plant operations in Cozumel, Quintana Roo, Mexico

Feasibility study for the construction of a Reverse-Osmosis plant, well field and distribution system for the Island of Cozumel, Quintana Roo, Mexico

3-Dimensional ground-water flow modeling to determine well placement for aquifer restoration, South Florida

Conducting and Supervising Phase I and Phase II Environmental Site Assessments.

Conducting and Supervising Aquifer Assessment and Remediation of contaminated sites.

Design and construction of effluent treatment systems for the farming industry

Installation of Geologic test holes to determine water supply potential, Aquaductos, San Juan, Puerto Rico.

Aquifer Testing and Consulting, Monserrate.

Aquifer Test Analysis, Deep Injection Wells, Dade County Water and Sewer Authority.

Aquifer Test Analysis, West Wellfield ASR Well, Dade County Water and Sewer Authority.

Aquifer Test Analysis, West Wellfield Biscayne Aquifer Wells, Dade County Water and Sewer.

Imokalee Well Field, Installation of Production Wells, Monitoring Wells, and Aquifer Testing.

City of Hollywood, Installation of two Shallow Injection Wells and Aquifer Testing.

Sombrero Golf Course, Installation of Production Well, Injection Well and Aquifer Testing for a Reverse Osmosis Plant, Marathon, Florida.

Installation of Test Wells and Aquifer Testing, Newton and Everglades Wellfields, Dade County Water and Sewer Authority.

St. Johns Water Management District Well Plugging Project.

Installation of Monitoring Well, Production Well and Aquifer Testing for Reverse Osmosis Plant, Palo Seco Power Plant, San Juan, Puerto Rico.

Hollywood West Wellfield, Installation of 6-24 inch Production Wells and Aquifer Testing, Hollywood, Florida.

Pompano West Wellfield, Installation of Test Well, Observation Wells and Aquifer Testing.

Newton and Everglades Wellfield, Development and Aquifer Testing of New Production Wells.

Installation of Observation Wells, Supply Wells and Aquifer Testing, City of Carolina, Puerto Rico.

Geologic Test Hole for Stormwater Wells, City of Highland Beach, Florida.

### **U.S. GEOLOGICAL SURVEY TRAINING COURSES**

10/20/75 - 10/24/75	Accelerated course in Fortran IV
01/17/77 - 01/28/77	Modeling of Ground-water Flow
05/09/77 - 05/11/77	Fresh-Water Salt-Water Relationships in Aquifers
02/25/80 - 03/07/80	Chemistry for Ground-Water Solute Transport Models
02/02/81 - 02/06/81	Analytical Methods to Determine Aquifer Properties and to Predict Aquifer Response
08/23/81 - 09/03/82	Modeling Transport of Ground-Water Solutes
01/09/84 - 01/13/84	Ground Water-Surface Water Relationships
06/04/84 - 06/15/84	Finite-Element Modeling of Ground-Water Flow
06/24/84 - 06/28/84	Parameter Estimation Techniques for Ground-Water Flow

### **U.S. GEOLOGICAL SURVEY WORKSHOPS**

02/15/78 - 02/17/78	Achieving Your Potential, Orlando, Florida
12/15/78 - 12/16/78	Ground-Water Modeling Workshop, Miami, Florida
02/27/79 - 02/28/79	Ground-Water Modeling Workshop, Tampa, Florida
06/13/79 - 06/14/79	Report Writing, Shipley, Miami, Florida
01/13/81 - 01/15/81	SAS Statistics
10/28/81 - 10/28/81	Advanced Technical Writing, Shipley, Miami, Florida
10/18/82 - 10/21/82	3-Dimensional Modeling of Ground-Water Flow (McDonald Model), Tampa, Florida
12/10/82 - 12/11/82	Advanced Report Writing, Shipley, Miami, Florida

### **CONTINUING EDUCATION, UNIVERSITY OF MIAMI**

01/01/73 - 05/01/73	Vectors and Matrices
01/03/77 - 05/01/77	Environmental Chemistry

01/03/80 - 05/01/80 Caribbean Geology and Geophysics

### **ADDITIONAL EDUCATION**

01/25/90 - 01/25/90 National Water Well Association Environmental Site Assessment, One Day Course

03/07/91 - 03/07/91 Legal Implication of Conducting Environmental Site Assessments

05/25/91 - 05/25/91 The National Institute for Storage Tank Management 2nd Annual Conference

40 Hour Hazmat Safety Course

### **Professional Memberships:**

National Water Well Association  
Miami Geological Society, Treasurer, 1982  
South Florida Association of Environmental Professionals  
(Board Member)

### **Committees:**

N.W. Wellfield Technical Advisory Committee  
West Wellfield Technical Advisory Committee  
Munisport Dump Coalition, Technical Advisory Committee

**APPENDIX 8.5**  
**SCOPE OF SERVICES**

This ESA will be conducted according to A.S.T.M. E1 527.13 standards and the Environmental Protection Agency's (EPA) All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312). This report also incorporates the requirements outlined in the ASTM standard E-1527-21.

Our ESA will include:

1. A visual inspection of the property and the surrounding neighborhood to determine existing and potential sources of environmental contamination.
2. A review of U.S. EPA, Florida State Department of Environmental Regulation, and local County listings and citations for environmental violations and past aquifer reclamation and remediation actions in the surrounding area. This review includes but is not limited to the following listing.
  - a. EPA CERCLIS
  - b. EPA NPL
  - c. EPA RCRA Registration/Permits
  - d. EPA Emergency Response Notification System
  - e. DEP Petroleum Storage Tank Facilities
  - f. DEP Leaking Storage Tank Sites
3. A description of the historic land use to determine possible past sources of contamination, including a review of aerial photography and of past ownership such as title abstract review (if supplied).
4. A description of the geohydrologic setting, which would include ground-water gradients, existing ground-water quality data, any possible upgradient contamination sources and locations of nearby wellfields, and review of available geotechnical data for the site.
5. Inspection of architectural and engineering plans for existing on-site buildings (if available and deemed necessary).
6. A visual reconnaissance will be conducted for asbestos containing materials (A.C.M.'s), Lead based paint, radon potential and wetlands.
7. **STANDARD OF PRACTICE:** Design professional will strive to conduct services under this agreement in a manner consistent with that level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions.

A written report presenting the results of the ESA for the property will be transmitted to you or to your legal counsel.

**APPENDIX 8.6**  
**USER QUESTIONNAIRE**

In accordance with the Standard Practice for environmental Site Assessment, per ASTM Designation E 1527-13, ASTM standard E-1527-21, and the Environmental Protection Agency's (EPA) All Appropriate Inquiry Rule "AAI Rule" (40 CFR 312) HAI must obtain the following information from the User (Client) prior to performing an Environmental Site Assessment. This information is important to ensure the accuracy of the final deliverable, and identification of potential Recognized Environmental Conditions. This information may be included in the Phase I ESA Summary Report.

**A. User/Client Information:**

Client Name: CITY OF MIAMI

Client Contact & Phone Numbers(s) Dollila Pinkhasov Tel 305-416-2184

Client Email Address: dpinkhasov@miamigov.com

Client Address: 14 NE 1st Ave, 2nd Fl, Miami, Fl 33132  
(Street) (City) (State) (Zip Code)

**B. Property Information:**

**B-1.** Subject Property Name/Designation: \_\_\_\_\_

**B-2.** Complete and correct address for the property (attach map & legal description if available):  
3431 NW 6 AVE (F#01-3125-020-0091, 1544 NW 58 TER (F#01-3114-035-2830), 1465 NW 60 ST(F#01-3114-035-1642), 411 NE 69 ST (F#01-3114-035-2830)

**B-3.** Please identify the Property Tax Folio ID Number(s): \_\_\_\_\_

**B-4.** Please identify the approximate age of on-site structures: VACANT LOTS

**B-5.** Please identify the following individuals (with phone number and/or email address), who may need to be contacted by HAI to complete the interview Section of the Phase I ESA: \_\_\_\_\_

a) Key Site Manager, with good knowledge of the Property: N/A

b) Current Owner/Operator of the Property: CITY OF MIAMI

c) Past Owner/Operator of the Property: \_\_\_\_\_

d) Knowledgeable Occupants: \_\_\_\_\_

**B-6.** Does the User/Client possess any other knowledge or experience with the Property that may be pertinent to the Environmental Professional (for example, copies of any available prior environmental site assessment reports, documents, etc., concerning the Property and its environmental condition).

No  Yes (If so, please provide HAI with copies of that information)

Describe Information: \_\_\_\_\_

**B-7.** Other than the client. Please identify all parties who will rely upon the Phase I ESA report.

**C. User/Client Reporting Obligation**

*The following are a series of questions from ASTM 1527-13 and ASTM standard E-1527-21 that must be answered in order to qualify for Landowner Liability Protection (LLP) under CERCLA. Please provide an answer to each question or attach pertinent information and identify a number of each attachment.*

**C-1.** Please indicate the reason why a Phase I ESA is required:

User Intends to Purchase the Property

User Intends to Sell the Property

User Intends to Lease the Property

User Intends to Refinance the Property

User Needs a Loan and Intends to Use Property as Collateral

Other (Describe below):

\_\_\_\_\_

**C-2.** Are you aware of any environmental cleanup liens against the property that are filled or recorded under federal, tribal, state or local law?

No  Yes (Describe or attach information)

Attachment No. \_\_\_\_\_

**C-3.** Are you aware of any *Activity and Use Limitations* (AULs), such as Engineering Controls (e.g. engineered caps, foundations, liners, treatment methods, etc. that may have been installed to prevent direct exposure to affected soil, or used to prevent contamination from migrating to surrounding areas), land use restrictions, or Institutional Controls (e.g. deed restrictions, covenants, and/or administrative measures restricting the use of soils, groundwater, construction, redevelopment, or property use) that are in-place at the site, and/or have been filed or recorded in a registry under federal, tribal, state or local law?

No  Yes (Describe or attach information)

Attachment No. \_\_\_\_\_

**C-4.** Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and process used by this type of business?

No  Yes (Describe or attach information)

Attachment No. \_\_\_\_\_

**C-5.** Does the User/Client have actual knowledge that the purchase price of the *Property* has been reduced below comparable properties, due at least in part to environmental conditions associated with the *Property*?

No  Yes (If so, please explain or attach information)

Attachment No. \_\_\_\_\_

**C-6.** Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases? For example, as User,

(a.) Do you know the past uses of the property?

No  Yes (Describe Below)

Attachment No. \_\_\_\_\_

(b.) Do you know of specific chemicals that are present or once were present at the property?

No  Yes (Describe or attach information)

Attachment No. \_\_\_\_\_

(c.) Do you know of spills or other chemical releases that have taken place at the property?

No  Yes (Describe or attach information)

Attachment No. \_\_\_\_\_

(d.) Do you know of any environmental cleanups that have taken place at the property?

No  Yes (Describe or attach information)

Attachment No. \_\_\_\_\_

(e.) As the User of the ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

No  Yes (Describe or attach information)

Attachment No. \_\_\_\_\_

**D. Additional Assessment services:**

This Phase I ESA will be performed within requirements of ASTM Designation E 1527-13 and ASTM standard E-1527-21 which do not include the assessment for other potential *Business Environmental Risks* that may affect the impending commercial property transaction. As such, the User/Client may require an expended scope of services, in addition to the Phase I ESA assessment.

**D-1.** Does the User/Client require HAI to conduct additional environmental assessment activities (above and beyond the standard Phase I ESA scope, as defined in ASTM Designation E 1527-13 and ASTM standard E-1527-21) ?

No  Yes (If Yes – Please respond to the following questions)

**D-2.** Please indicate which of the following potential environmental concern(s) that you would like to have HAI assess (HAI will provide a separate proposal to address this request):

- Asbestos – Containing Materials Assessment
- Mold & Mildew Assessment
- Radon Assessment
- Lead – Based Paint Assessment
- Lead in Drinking Water Assessment
- Wetland Assessment
- Regulatory Compliance Audit
- Cultural and Historic Resources Assessment
- Endangered Species Assessment
- Indoor Air Quality or Industrial Hygiene Assessment
- Health and Safety Assessment
- Building Condition Assessment
- Other Environmental and/or Engineering Concerns (please describe):

**Authorization:**

I am the User, or have been authorized to complete this form on behalf of the User, and have completed it to the best of my knowledge and experience:

**Signature:** \_\_\_\_\_

**User/Client Name:** \_\_\_\_\_  
\_\_\_\_\_

**Date:** \_\_\_\_\_
